Team: Sample Team Team Role Averages

This report shows the team average for each Team Role. The information below describes the possible positive and negative implications of the Team Role "culture".

This report is based on Self-Perception plus Observer Assessments.

This team has a strong service orientation with a willingness to do what is needed and to do it well. This combination will be invaluable, given the right setting. However, much will depend on whether it has been brought together for an assignment that is well-devised and well-understood from the outset. Failing that, the question is whether there is one strong creative person within the team who will take the lead. If not, then this team may lack direction.

The best scenario is of a team that will make a thorough job of any work taken on and be keen to ensure that standards are maintained. This team will strive for perfection and aim to achieve the highest professional reputation.

This team is likely to avoid any risk of conflict, but in so doing it may back away from taking difficult decisions. The team may need someone willing to take on a leading role in driving its members forward or who is prepared to stand up and take a strong minority view.
